

SYSTEM AND METHOD OF GRAPHICALLY DISPLAYING DATA FOR AN INTRUSION PROTECTION SYSTEM

ABSTRACT OF THE INVENTION

In an embodiment of the present invention, a method of displaying data related to an intrusion event on a computer system comprising the steps of capturing data related to the intrusion event, decoding the captured data from a predetermined format to a predetermined format decipherable by humans, the decoded data comprising data components intrusion signature, data summary, and detailed data, correlating data components of the intrusion signature, data summary and detailed data to one another. The method further comprises the steps of retrieving an web browser-based template, and graphically displaying the correlated decoded data components using the web browser-based template.
